CHRONOFLEX® 5F CATHETER

You need enhanced performance and low complication rates. Your patients need comfort.

The Chronoflex® 5F catheter is the solution. The smallest, most versatile CT power injectable catheter on the market, the 5F can be used with our family of MedComp CT ports. Ordering is simple with our full range of vascular access products and implantable ports.

Advanced

When it comes to vascular access, smaller is almost always better. The Chronoflex® 5F catheter offers reliable functionality that both patients and clinicians depend on.

Versatile

This catheter can be used for chest or arm placement and is available with our Medcomp's family of CT implantable ports.

Uncomplicated

The smallest of the power injectable kind, the 5F takes up less space in the vein which improves venous flow and reduces the risk of complications.

Our smallest innovation yet
